## PROFESSIONAL SUMMARY

AI Product Manager / Product Owner with 16+ years across enterprise software, B2B/B2C products and SaaS, specializing in Agentic AI, AI agent platforms, GenAI copilots, RAG, deep research and workflow automation. At JAGGAER, own the Agent OS product roadmap spanning supervisor agents, API integrations, guardrails, observability and enterprise AI governance.

Lead products from customer discovery and feature prioritization through rapid proof of concept (PoC), pilot validation, launch and adoption. Partner with engineering, design, enterprise customers and GTM teams on AI solutions, demos and measurable outcomes: up to 50% faster decisions, ~35% productivity improvement, 92% RAG accuracy and a $7.5M qualified pipeline.

## CORE SKILLS

**AI Agent Platform & Innovation:** Agentic AI, AI Agents & Orchestration, Supervisor & Sub-Agents, Autonomous Workflows, AI Copilots, RAG, Deep Research, Guardrails, Human-in-the-Loop, RBAC, Observability

**Product Strategy & Agile Delivery:** AI Platform Roadmaps, Feature Prioritization, Product Vision, PRDs & Requirements, Agile Backlogs, Cross-Functional Feasibility, Product Discovery, Customer-Driven Iteration

**Customer Engagement & PoC Execution:** User Research, Customer Pain Points, Forward-Deployed Customer Co-Creation, Rapid Prototyping, Proofs of Concept (PoCs), Pilot Validation, Solution Demos, Stakeholder Communication

**AI Integration & Product Outcomes:** REST APIs, ServiceNow-Integrated AI Chatbot, Salesforce, SAP Ariba, JAGGAER, Conversational AI, Product KPIs, AI Evaluation, Customer Adoption, Case Resolution Time, GTM Enablement

**Technical & Product Tools:** Kore.ai Platform, Google AI Studio, Google Antigravity, GitHub, Claude, Devin, Langfuse, Snowflake + Cortex AI, Prompt Engineering, SQL, Figma, Mixpanel, Pendo

## PROFESSIONAL EXPERIENCE

### AI Product Manager | JAGGAER

**Hyderabad, India** | *Source-to-Pay and Supplier Intelligence solutions* **Sep 2025 - Present**

- **AI Agent Platform Strategy & Roadmap:** Own Agent OS strategy, roadmap and feature prioritization for an enterprise agent orchestration platform with supervisor agents, guardrails, API tool integrations, Langfuse tracing and reusable AI capabilities; reduced procurement decision time by up to 50%.
- **Rapid Agentic PoCs & Customer Co-Creation:** Partnered with 2 strategic customers via the Forward-Deployed Engineer model to turn feedback into requirements and roadmap priorities; prototyped an Autonomous Sourcing Agent MVP in 3 days using Devin and Claude, reducing roadmap sign-off from 4 weeks to 5 days.
- **AI Evaluation, Security & Governance:** Shipped citation-backed RAG over 10K+ customer documents with malware scanning; reached 92% accuracy on an internal evaluation set and zero security incidents across 4 pilot customers; defined RBAC-governed agents, human approvals and audit trails.
- **AI Data Platform & Deep Research:** Defined Snowflake + Cortex AI semantic models across 12B procurement transactions and 13M suppliers; enabled Deep Research agents to shorten analyst research from ~25 minutes to ~5 minutes.
- **Enterprise AI Launch & ServiceNow Integration:** Launched JAI copilot and AI agents across Spend, Sourcing, Contracts, Invoicing, Payments and Supplier Management (~35% productivity gain); integrated an AI chatbot with Salesforce and ServiceNow, routing 60% of tier-1 tickets to AI-assisted resolution and cutting mean resolution time by 30%.
- **PoC Demos, Customer Value & GTM:** Partnered with Sales on AI solution demos, product storytelling and solution design for US/UK enterprise prospects, contributing to a $7.5M qualified pipeline and supporting ~$1M in closed deals.

### Product Manager | Kore.ai

**Hyderabad, India** | *Enterprise Agentic AI, Conversational AI and Contact Center AI platforms* **Dec 2022 - Sep 2025**

- **GenAI PoCs & Case Management:** Led design, prototyping and launch of GenAI-powered Case Management for Contact Center AI, including autonomous case triage, resolution and escalation workflows; generated $300K ARR from 2 enterprise clients.
- **AI Platform Modernization:** Upgraded SmartAssist into a GenAI-enabled SaaS platform across Agent AI, Search AI, Automation AI and Contact Center AI; enabled 5+ enterprise account upgrades and a $1M upsell opportunity.
- **API-Integrated Conversational AI Products:** Conceptualized ProcureAssist and SalesAssist with chat-based CRUD workflows integrated with SAP Ariba, JAGGAER and Google Chat; improved procurement search by 60% and SDR/BDR conversions by 40%.
- **Customer Engagement & Measurable Growth:** Led Outbound Campaign Management with personalized, context-aware SMS and voice workflows, improving conversions by 25% and generating $500K ARR from 2 enterprise clients.

### Lead Business Analyst / Lead Product Owner | Conduent

**Hyderabad, India** | *Transportation, tolling and transit products* **Jan 2019 - Dec 2022**

- **Enterprise Product Ownership:** Led Road Usage Charging product development across B2B CRM, B2C web and mobile applications; aligned customer stakeholders, engineering teams and third-party vendors to deliver the NJTA E-ZPass system.
- **User Adoption & Operational KPIs:** Increased monthly active users by 45% and mobile-app CSAT by 40%; reduced inbound-call resolution time by 40% and walk-in center visits by 50%.

### Senior Business Process Developer | Pegasystems

**Hyderabad, India** | *Enterprise workflow and CRM software* **Sep 2016 - Jan 2019**

- **Workflow Product Discovery & Launch:** Led Pega 8.1 Field Service Management product from ideation to launch across multiple industries; improved field-technician utilization by 30% through dispatcher-engine optimization and competitive-informed enhancements.

### Assistant Manager - Business Analyst | Renault-Nissan Technology & Business Centre India

**Chennai, India** | *Automotive product and engineering systems* **May 2013 - Sep 2016**

- **Requirements & Stakeholder Alignment:** Led BOM product enhancements across Early, Engineering, Manufacturing and Service BOM for Renault, Nissan, Daimler and Dacia; conducted requirements workshops at Renault Technocentre in Paris.

### Associate - Projects | Cognizant

**Hyderabad, India** | *Technology services and software delivery* **Dec 2007 - Jul 2011**

- **Enterprise Software Development:** Developed J2EE web applications for American Express Europe and US and supported content management using Vignette CMS.
