Sreenivas Vinnakota

AI Product Manager | Agentic AI Platforms | Enterprise SaaS

Hyderabad, India | Email / LinkedIn | sreenivas.vinnakota1@gmail.com | LinkedIn: linkedin.com/in/vasuart/

PROFESSIONAL SUMMARY

AI Product Manager / Product Owner with 16+ years of experience building enterprise B2B, B2C and SaaS products, including Agentic AI, autonomous agents, AI copilots, RAG, deep research and conversational AI. At JAGGAER, own product strategy for Agent OS and procurement AI initiatives spanning agent orchestration, semantic data, RBAC-governed action agents, human-in-the-loop controls, observability and customer validation.

End-to-end product leader across discovery, delivery and distribution: user/customer research, problem framing, opportunity sizing, product vision and roadmaps, PRDs and prioritization, prototyping and validation, cross-functional execution, launch/GTM, adoption and performance optimization. Delivered 50% faster decision-making, 35% productivity improvement, 92% RAG accuracy, ~$2M in addressable spend, a $7.5M qualified pipeline and ~$1M in closed deals.

CORE SKILLS

AI Product & Platform: Agentic AI, Autonomous Agents, AI Agents & Orchestration, Supervisor & Sub-Agents, RAG, AI Copilots, Deep Research, Human-in-the-Loop, Guardrails, Observability, RBAC / Agent Governance

Product Discovery & Strategy: User/Customer Research, Market & Trend Analysis, Stakeholder Alignment, Problem Framing, Opportunity Sizing, Personas & Journey Mapping, Concept Development, Prototyping & Validation, Product Vision, Roadmaps, Data-Driven Insights

Product Delivery: PRDs & Product Requirements, Backlog Prioritization, Agile Planning, Cross-functional Alignment, Solution Design & Refinement, Integrations, Product Evaluation & Quality, Launch Management, Continuous Improvement Loops

Product Distribution & Growth: Positioning & GTM Strategy, Product Storytelling, Launch Execution, User Activation & Retention, Conversion Optimization, Performance Analytics & Optimization, Pricing, Sales Enablement

Technical & Product Tools: Kore.ai Platform, Google AI Studio, Google Antigravity, GitHub, Prompt Engineering, REST APIs, SQL, Langfuse, Claude (incl. Claude Design for UX prototyping), Claude Cowork, Windsurf, Devin (agent vibe-coding), Figma, Mixpanel, Pendo

PROFESSIONAL EXPERIENCE

AI Product Manager | JAGGAER

Hyderabad, India | *Source-to-Pay and Supplier Intelligence solutions* **Sep 2025 - Present**

- **Agent OS & Platform Strategy:** Own product strategy and roadmap for an enterprise agent orchestration platform spanning supervisor agents, guardrails, API tool integrations and Langfuse tracing; translate customer and stakeholder needs into reusable AI platform capabilities, reducing procurement decision time by up to 50%.
- **Semantic Data & Agent Governance:** Defined the data platform roadmap using Snowflake + Cortex AI semantic models over 30 years of procurement history (12B transactions, 13M suppliers); enabled Deep Research agents to cut analyst research time from ~25 min to ~5 min and designed RBAC-governed action agents with human-in-the-loop approval and a full audit trail.
- **RAG Quality & Safety:** Shipped and validated a RAG knowledge base ingesting 10K+ customer documents (PDF, Excel, Word) with malware scanning and citation-backed answers; reached 92% accuracy on an internal eval set with zero security incidents across 4 pilot customers, supporting a ~$300K upsell pipeline.
- **Customer Discovery & Validation:** Ran the Forward-Deployed Engineer (FDE) model with 2 strategic customers as a continuous discovery loop, converting field feedback into problem framing, opportunity sizing and roadmap priorities; prototyped an Autonomous Sourcing Agent MVP in 3 days using Devin and Claude, cutting roadmap sign-off from 4 weeks to 5 days and targeting ~30% faster sourcing cycles across ~$2M in addressable spend.
- **Launch, Adoption & Optimization:** Launched JAI, a RAG-based procurement copilot, and expanded AI agents across Spend, Sourcing, Contracts, Invoicing, Payments and Supplier Management (~35% productivity gain); integrated the AI chatbot with Salesforce and ServiceNow, routing 60% of tier-1 tickets to AI-assisted resolution and cutting mean resolution time 30% (48h to 33h).
- **GTM & Commercial Impact:** Partnered with Sales on AI product storytelling, demos and solution design for US/UK enterprise prospects, contributing to a $7.5M qualified pipeline and supporting ~$1M in closed deals.

Product Manager | Kore.ai

Hyderabad, India | *Enterprise Agentic AI, Conversational AI and Contact Center AI platforms* **Dec 2022 - Sep 2025**

- **Growth & Performance Optimization:** Led Outbound Campaign Management, generating $500K ARR from two enterprise clients and improving conversion by 25% through personalized, context-aware SMS and voice campaigns.
- **GenAI Case Management:** Led design, prototyping and launch of a GenAI-powered Case Management product for Contact Center AI, generating $300K ARR from two clients and prototyping autonomous triage, resolution and escalation workflows.
- **Enterprise SaaS Platform:** Upgraded SmartAssist into a GenAI-enabled SaaS platform spanning Agent AI, Search AI, Automation AI and Contact Center AI; enabled 5+ enterprise account upgrades and a $1M upsell opportunity.
- **Conversational AI Products:** Conceptualized and built ProcureAssist and SalesAssist, driving 60% improvement in procurement search and chat-based CRUD operations through SAP Ariba, JAGGAER and Google Chat integrations, and 40% higher SDR/BDR conversions.

Lead Business Analyst / Lead Product Owner | Conduent

Hyderabad, India | *Transportation, tolling and transit products* **Jan 2019 - Dec 2022**

- **B2B/B2C Product Delivery:** Led Road Usage Charging product development across B2B CRM, B2C web and mobile applications; aligned NJTA, internal teams and third-party vendors and delivered the E-ZPass system for the New Jersey Turnpike Authority.
- **Activation & Customer Experience:** Increased monthly active users by 45% and mobile-app CSAT by 40%; reduced inbound-call resolution time by 40% and walk-in center visits by 50%, improving digital adoption and operational efficiency.

Senior Business Process Developer | Pegasystems

Hyderabad, India | *Enterprise workflow and CRM software* **Sep 2016 - Jan 2019**

- **Concept-to-Launch Product Development:** Led a Field Service Management product on Pega 8.1 from ideation to launch across marine engines, furniture and beverage operations; improved field-technician utilization by 30% through an optimized dispatcher engine and used competitive analysis to shape enhancements.

Assistant Manager - Business Analyst | Renault-Nissan Technology & Business Centre India

Chennai, India | *Automotive product and engineering systems* **May 2013 - Sep 2016**

- **Requirements & Stakeholder Alignment:** Led BOM product enhancements across Early, Engineering, Manufacturing and Service BOM for Renault, Nissan, Daimler and Dacia; facilitated requirement workshops with design engineers at the Renault Technocentre in Paris and translated business needs into product requirements.

Associate - Projects | Cognizant

Hyderabad, India | *Technology services and software delivery* **Dec 2007 - Jul 2011**

- **Software Delivery:** Developed J2EE web applications for American Express Europe and US and supported content management using Vignette CMS.
